Understanding drug payment phases

\$700	Deductible phase The amount you pay before you begin to receive benefits from the plan. You'll pay the discounted cost of the drug.
Up to \$2,400	Initial coverage phase During this phase, you pay a copayment or coinsurance (your share of the cost) for the discounted price of each prescription.
Through the end of the year	Catastrophic coverage phase You pay \$0 for Part D covered drugs during this phase. You'll stay in this phase through the end of the plan year.

Are you looking for more than just prescription drug coverage?

- Instead of paying Part D premiums, have you looked at our \$0 premium Medicare Advantage plans which include prescription coverage? Often times drug coverage within our Medicare Advantage plans can be richer than standalone Part D plans like Choice, even at \$0 premiums. For more information and to find out if there is a \$0 Medicare Advantage plan in your state, visit [aetna.com/medicare](https://www.aetna.com/medicare).
- Have Medicare and Medicaid? We also offer Dual Eligible Special Needs Plans (D-SNPs) in some states with \$0 premium and low or zero dollar cost sharing based on your level of eligibility. They provide Medicare Advantage benefits, prescription drug coverage, plus additional benefits.
- We offer Special Needs Plans (C-SNPs) designed for members with certain chronic conditions, with benefits and support tailored to your health needs.
