What is coinsurance?

Coinsurance is a portion or part of the total cost, typically as a percentage. For example, if your coinsurance is 25% and the total cost of your prescription is \$100, you would pay \$25. The plan pays the rest. You pay the full cost of your drugs until you meet the deductible, then you'll start paying the coinsurance amount.

Prescription drug payment stages

Deductible	Your plan has a \$700 prescription drug deductible. You pay the full cost for your drugs until you reach the deductible amount. Then you move to the Initial Coverage stage.		
Initial Coverage	In this stage, you'll pay your plan copays or coinsurance. The plan pays the rest. Once you, and others on your behalf, have paid a combined total of \$2,400, which includes the amount you paid towards your deductible, you move to the Catastrophic Coverage stage.		
Drug Coverage	Retail	Mail Order	
	30-day supply[^]	100-day supply	100-day supply
All covered drugs³	25% coinsurance	25% coinsurance (Some covered drugs are limited to a 30-day supply)	25% coinsurance (Some covered drugs are limited to a 30-day supply)
Catastrophic Coverage	Once you're in this stage, you won't pay anything for your Medicare-covered Part D drugs for the rest of the plan year.		

[^]Members living in long-term care facilities pay the same for a 31-day supply as a 30-day supply at a retail pharmacy.

³You pay no more than 25% of the total drug cost or a \$35 copay, whichever is lower, for each 1-month supply of Part D covered insulin drugs, even if you haven't paid your deductible, until you reach the Catastrophic Coverage stage where you pay \$0.
